TRAUTMAN, E. D., Tracer Measurements of Non-Equilibrium Volumes of Distribution 515

OLIVIER, T. J., Use of Keyed Character String Data Structures and Operators in Models of Primate Groups 539

KUBO, K., A View on the Break in the Arrhenius Plots . . 551

PÈPE, G., SERRES, B., LAPORTE, D., DEL RE, G. and MINICHINO, C., Surface Electrostatic Potentials on Macromolecules in a Monopole Approximation: a Computer Program and an Application to Cytochromes 571

LACEY, J. C., JR. and MULLINS, D. W. JR., Genetic Coding Catalysis 595

GERO, A., Desensitization and Coupled Receptors: A Model of Drug Dependence 603

CHARNOV, E. L. and BULL, J. J., Sex Allocation in a Patchy Environment: A Marginal Value Theorem 619

RAFFA, R. B. and TALLARIDA, R. J., The Concept of a Changing Receptor Concentration: Implications for the Theory of Drug Action 625

LETTER TO THE EDITOR

KAPLAN, J. I., Re-evaluation of the Corrected Signal from Fluoroscopic Probe Measurements 633

Index to Volume 115

Affinity variation, apparent, of guarded receptors, mechanisms of, 337
Alga Micrasterias (Chlorophyta, Conjugatophyceae), unicellular, simulation of morphogenesis and speciation in, 401
Alleles, deleterious, conditions for protection of, in a subdivided population; social selection in human populations, 455
ANDREASEN, V. (see CRAIG, C. L.), 201
Arrhenius plots, a view on the break in, 551
Asymmetry, meso and racemic organisms and the transition to, 415
Atherosclerosis, evidence that lysolethicin is an important causal agent, 27

Bacteria, Gram negative, patterns of LPS synthesis in, 213
Bacteria respiring microaerobically, the flux of O_2 affects apparent optimal concentrations of O_2 in suspensions of, 93
BASTMEYER, M. (see FUGE, H.), 391
BERGERSEN, F. J. and TRINCHANT, J.-C., Flux of O_2 affects apparent optimal concentrations of O_2 in suspensions of bacteria respiring microaerobically, 93
Biological systems, time-dependent interfacial charging effects of electrical fields applied to, 129
Biomembranes, thermosynthesis by; energy gain from cyclic temperature change, 429
BISWAL, U. C. (see RAVAL, M. K.), 137
BLOMBERG, C., Optimization of error-correction processes with respect to time, comparison to free energy aspects, 241
BULL, J. J. (see CHARNOV, E. L.), 619

Cannibalism, on the evolution of, 161
Catalysis, genetic coding, 595
Challenge put into resource exploitation: a model of contest competition, 367
Charged particles, heavy, energetic, in matter, dissipative processes of, 287
Charging effects, interfacial, time-dependent, of electrical fields applied to biological systems, 129
CHARNOV, E. L. and BULL, J. J., Sex allocation in a patchy environment: a marginal value theorem, 619
Chemically induced growth with one-dimensional mass transfer, analysis of, 221
Chromosome movement, a model based on lateral interaction of spindle microtubules, 391
Competition, contest, model: putting the challenge into resource exploitation, 367
Competition within and between species in a patchy environment: relations between microscopic and macroscopic models, 65
Complexity is not eliminated from the real world by simple models (letter), 467
Conformational deviations, helical, large, from ideal B-DNA and prokaryotic regulatory sites, 179
Cortex, extracellular fields within, 43
Coupled receptors and desensitization: a model of drug dependence, 603

CRAIG, C. L., OKUBO, A. and ANDREASEN, V., Effect of spider orb-web and insect oscillations on prey interception, 201
CSANYI, V. (see KAMPIS, G.), 467
Cyclic temperature changes, energy gain from; thermosynthesis by biomembranes, 429
Cytochromes, application of surface electrostatic potentials on macromolecules in a monopole approximation, 571

Data structures, keyed character string, and operators; use in models of primate groups, 539
DEFELICE, L. J. (see KELL, M. J.), 103
Defense of heat shock proteins against intracellular pathogens: a non-immunological basis for self/non-self discrimination (letter), 471
DEL RE, G. (see PÈPE, G.), 571
Desensitization and coupled receptors: a model of drug dependence, 603
Diffusion–reaction system in primary hair follicles, spatial patterns produced by, 299
Dissipative processes of energetic heavy charged particles in matter, 287
Distribution, tracer measurements of non-equilibrium volumes of, 515
DNA sequence and secondary structure of the herpes simplex virus L/S junction and the adeno-associated virus terminal repeat, comparison of, 477
B-DNA, ideal, large helical conformational deviations from, and prokaryotic regulatory sites, 179
Drug action theory and the implications of the concept of a changing receptor concentration, 625
Drug dependence model: desensitization and coupled receptors, 603

Efficiency and non-local thermodynamic effects of oxidative phosphorylation, 153
Electrical fields applied to biological systems, time-dependent interfacial charging effects of, 129
Electrostatic potentials, surface, on macromolecules in a monopole approximation: a computer program and an application to cytochromes, 571
Energetic heavy charged particles in matter, dissipative processes of, 287
Energy conversion systems, irreversible, hierarchies of; network derivation of linear transport equations, 319
Energy equilibrium analysis of freeze-fracture planes in membranes, 103
Energy gain from cyclic temperature change; thermosynthesis by biomembranes, 429
Environment, patchy, competition within and between species in; relations between microscopic and macroscopic models, 65
Environment, patchy, sex allocation in; a marginal value theorem, 619
Equilibrium energy analysis of freeze-fracture planes in membranes, 103
Error-correction processes, optimization with respect to time, and comparison to free energy aspects, 241
Evolution of cannibalism, 161
Evolutionarily stable strategies for predator switching, 351
Evolutionary stability, the essential properties of, 269
Extracellular fields within the cortex, 43

FELDMANN, R. (see RAYFIELD, M.), 477
FERRER, F. and JOU, D., Non-local thermodynamic effects and efficiency of oxidative phosphorylation, 153

FERRIER, J., Time-dependent interfacial charging effects of electrical fields applied to biological systems, 129
Field model, two vector, of limb regeneration and transplant phenomena, 495
Fields, electrical, applied to biological systems, time-dependent interfacial charging effects of, 129
Fields, extracellular, within the cortex, 43
FISHER, R. R. and SEAGRAVE, R. C., Analysis of chemically induced growth with one-dimensional mass transfer, 221
Fitness, true, sexual selection, and handicaps, 1
Fluoroscopic probe measurements, re-evaluation of the corrected signal from (letter), 633
Follicles, hair, primary, spatial patterns produced by a reaction–diffusion system in, 299
FORSDYKE, D. R., Heat shock proteins defend against intracellular pathogens: a non-immunological basis for self/non-self discrimination (letter), 471
Free energy aspects, and the optimization of error-correction processes with respect to time, 241
Freeze-fracture planes in membranes, equilibrium energy analysis, 103
FUGE, H., BASTMEYER, M. and STEFFEN, W., A model for chromosome movement based on lateral interaction of spindle microtubules, 391

Genetic coding catalysis, 595
GERO, A., Desensitization and coupled receptors: a model of drug dependence, 603
GERRARD, R. (see MURRAY, M. G.), 367
GOOLSBY, W. (see KELL, M. J.), 103
GRAFSTEIN, D., Meso and racemic organisms and the transition to asymmetry, 415
Gram negative bacteria, patterns of LPS synthesis in, 213
GREEN, H. S. and TRIFFET, T., Extracellular fields within the cortex, 43
Growth, chemically induced, with one-dimensional mass transfer, analysis of, 221

Hair follicles, primary, spatial patterns produced by a reaction–diffusion system in, 200
Handicaps, true fitness, and sexual selection, 1
HARVEY, I. F. (see ROWE, G. W.), 269
Heat shock proteins defend against intracellular pathogens: a non-immunological basis for self/non-self discrimination (letter), 471
Helical conformational deviations, large, from ideal B-DNA and prokaryotic regulatory sites, 179
Herpes simplex virus L/S junction and the adeno-associated virus terminal repeat, comparison of the DNA sequence and secondary structure of, 477
Hierarchies of irreversible energy conversion systems. Network derivation of linear transport equations, 319
HOLLETT, M. D. (see STARMER, C. F.), 337
HUBBARD, S. F. (see ROWE, G. W.), 269
Human populations, social selection in; conditions for protection of deleterious alleles in a subdivided population, 455
HUNT, F., Patterns of LPS synthesis in Gram negative bacteria, 213

Interfacial time-dependent charging effects of electrical fields applied to biological systems, 129

Insect oscillations and spider orb-web, their effects on prey interception, 201
Irreversible energy conversion systems, hierarchies of; network derivation of linear transport equations, 319
IVES, A. R. and MAY, R. M., Competition within and between species in a patchy environment: relations between microscopic and macroscopic models, 65

JOU, D. (see FERRER, F.), 153
